It is the amount of thought and applied energy that causes a man to rise above the average, whether in dairying or wheat or corn growing. A dairy herd can't be built up, by growing and haultag feed alone. The man's mind and the things the mind only can do will improve the herd. These columns give you the best thought of the time in dairy herd improvement; and so does the thinking. If you will apply the thought of the time in dairy herd improvement and so does the thinking. If you will apply the thought it will be well worth your whiles—Kansas Parmer.

Surely all right thinking persons will agree that the property owners at Frank are perfectly justified in seeking compensation from both the Provincial and Dominion governments for the property which many of the Frank people

forced to leave to the m province and has received a large sum of money in royalty from the chief industry at Frank. The provincial government has received vast sums of money in taxes from the huginess people and other citizens. It is, therefore, only right that a commission should be appointed by the people of Frank and the governments to decide what the different properties are worth and to arrange the compensation which should, and let us hope will, be paid to the people who have been instructed by the federal government to move away from their property at Frank.
